EDUCATION

Computer Science · CÉGEP André-Laurendeau

Graduated 2026

SKILLS

Languages: French, English

Programming: TypeScript, JavaScript, HTML, CSS, Python, Java, C#, SQL

Frontend: React, Next.js, Vue, Nuxt, Angular, Tailwind CSS

Backend: Node.js, Spring Boot, ASP.NET Core

Databases: PostgreSQL, SQL Server, NeonDB

Tools: Git, Docker, Agile, Vercel, Claude API, Jira, Notion, Figma

EXPERIENCE

Full-Stack Developer – OpenPayrun

Services Conseils Sensoroli Inc. · Montréal, QC

Jul 2026 – Present

open-payrun.vercel.app

- Angular, TypeScript, HTML, CSS, C#/.NET, SQL Server: built a Quebec payroll calculator (QPP, EI, QPIP, income tax) to replace QuickBooks for in-house payroll
- REST API design, EF Core, and XUnit tests across the full stack; frontend on Vercel, backend self-hosted via Docker to avoid Oracle Cloud VM wait times and hosting costs

Full-Stack Developer Intern – Internal Marketing Tool

EnJoySocial · Montréal, QC

Jan 2026 – May 2026

marketing-tool-one.vercel.app

- Vue, Nuxt, TypeScript, HTML, CSS, NeonDB, ApexCharts: built an internal budget management tool with colorblind-friendly charts and forecasting, because tables weren't intuitive enough for tracking campaign performance
- Claude API: conversational chatbot to query budget data in plain English

Full-Stack Developer Intern – Social Platform

EnJoySocial · Montréal, QC

Dec 2024 – Dec 2025

enjoysocial.ca

- React Native, Nuxt, TypeScript: built a full social platform from scratch (groups, events, marketplace, quests), then rewrote the platform from mobile to web after a startup direction change
- Supabase, TypeScript, SQL: designed and maintained the full data model across groups, events, marketplace, and quests, adapting the schema after the mobile-to-web pivot
- Agile: sprint planning and build presentations each iteration directly with the CEO, CTO, marketing, and design team

PROJECTS

Prose

Academic project — internship platform rebuild

Sep – Dec 2025

prose-jet.vercel.app

- React, JavaScript, HTML, CSS: built the notification subsystem and navigation end-to-end; hardened security and built i18n infrastructure across the full codebase
- Docker, Spring Boot, Java, PostgreSQL, SQL: rebuilt our cégep's internship platform with a 5-person team over 6 Agile sprints

Next Stitch

Personal project — sewing project manager

Jan – Jun 2026

next-stitch-henna.vercel.app

- React, Next.js, TypeScript, HTML, CSS, NeonDB: built a personal project manager to replace a scattered notes-and-photos workflow, with pattern tracking, progress photos, and checklists
- Claude API, next-auth: AI-generated drafts when no reference exists; multi-user authentication

BiggerWorld

Personal project — self-hosted homelab cluster

Feb 2026 – Present

github.com/StacAttacc/BiggerWorld

- Linux, Docker, Kubernetes: self-hosted cluster running all personal project backends, with SSO, secret management, and full observability
- Flux, GitOps: CI/CD pipeline — every workload deployed automatically from Git, infrastructure fully reproducible from code
